

I believe that XM should have the right to offer Traffic and Weather on there network. It benifits me greatly when I travel and is the best option thus far. Maybe if the NAB members would focus more on improving what they have and less time trying to stifle others from trying to make it better it would be more beneficial to the listeners. One reason I stopped listening to commerical radio. I urge the FCC to keep it fair and reject NAB's petition 04-160.
